Projects

Legal AI NLP — Summarization & Clause Risk Analyzer | Python, Huggingface Transformers, Pytorch March 2026 - April 2026

- Built an NLP pipeline for Indian legal documents with two fine-tuned models: one that summarizes court judgments, one that classifies contract clauses by risk level.
- Fine-tuned google/flan-t5-base on ILDC judgments (ROUGE-L > 0.35) and law-ai/InLegalBERT for 3-class clause risk — Macro-F1 of 0.94, High-Risk Precision of 0.97. When it flags a clause as high-risk, it is almost always right.
- The dataset was heavily imbalanced. Used inverse-frequency class weighting in a custom PyTorch training loop so the model could not just ignore rare high-risk patterns and still score well.
- Github Repository Link: https://github.com/HritikGodara/legal_ai_nlp

Medical Image Analysis | Python, Tensorflow/keras, OpenCV, Scikit-learn January 2026 - February 2026

- Built a DenseNet121 classifier with transfer learning to detect disease across three imaging types: chest X-rays (pneumonia), COVID-19 radiographs, and brain MRI scans.
- 90.8% accuracy / ~95% recall on pneumonia, 87% on 4-class COVID-19, 88.8% on brain tumors — all from ImageNet-pretrained weights, no domain-specific pretraining.
- Added Grad-CAM so predictions come with spatial heatmaps. A clinician can see which regions the model is reacting to, not just what it decided.
- Github Repository Link: https://github.com/HritikGodara/Medical_image_analysis

Training

Android Developer Pro Training June 2025 - July 2025

Lovely Professional University

- Shipped Android apps to the Play Store across multiple projects, covering architecture, REST API integration, Firebase real-time data, and release management.
- The API integration work maps directly to how ML inference endpoints get consumed in mobile apps — same patterns, different payload.
- Working under industry-style workflows (code review, version control, CI expectations) built habits that matter more in team settings than any individual project does.

Certificates

Oracle Cloud Infrastructure 2025 Certified Data Science Professional August 2025

Oracle — [Certificate Link](#)

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate August 2025

Oracle — [Certificate Link](#)

Master Generative AI & Generative AI tools August 2025

Infosys — [Certificate Link](#)

Technical Skills

Languages: Python, C/C++, Java, Javascript, Kotlin, HTML/CSS

Frameworks & Tools: TensorFlow, PyTorch, Scikit-Learn, Hugging Face Transformers, OpenCV, Kaggle, AWS, Git/GitHub, Ubuntu

AI/ML: Computer Vision, NLP & Text Classification, LLM Fine-tuning, Generative AI, Transfer Learning, Model Evaluation

Core: Data Structures & Algorithms, Problem-Solving, REST API Integration, Software Engineering Fundamentals

Education

Lovely Professional University Punjab 2023 – 2027

Bachelor of Technology in Computer Science and Engineering (AI/ML Specialization) — CGPA: 7.00 Phagwara, Punjab

MSD Spring Bells Public School 2022 – 2023

Class XII, Science Stream (Physics, Chemistry, Mathematics) — 69% Fatehabad, Haryana

MSD Spring Bells Public School 2020 – 2021

Class X — 65% Fatehabad, Haryana
